AUTOMATED EXTERNAL DEFIBRILLATORS (AED)

DEFIBTECH LIFELINE

The Lifeline AED has incorporated some of the best technology, yet placed it in an AED that is extremely easy to use that even untrained users could successfully use the device. The unit is very simple in its design, with only two buttons and no moving parts or lids to slow the rescue. Clear voice prompts and status lights guide the rescuer through the entire process. As protocols change and upgrades are needed to be performed the Lifeline AED can easily be upgraded with a data card.

TRAINING

TRAINING

Emergency First Aid & CPR - First aider 1 (8 hour course)

This course provides simple First Aid & CPR techniques taught in an interactive environment, for individuals who want an overview of First Aid & CPR for the home or workplace. The course covers skills needed to recognize and respond to cardiovascular emergencies for adults, CPR, and other topics such as choking, airway and breathing emergencies and prevention of disease transmission

Standard First Aid & CPR - First aider 2 (16 hour course)

This course provides comprehensive First Aid & CPR techniques for those who want more knowledge to respond to emergencies in the home or workplace. A variety of topics are covered from basic first aid such as cardiovascular and breathing emergencies, CPR, prevention of disease transmission to more severe sudden medical conditions and injuries to the head and spine.

Emergency First Aid- Adult Only (4 hours)

This course provides simple first aid techniques taught in an interactive environment, for individuals who want an overview of First Aid for the home or workplace. The course covers skills needed to recognize and respond to cardiovascular emergencies for adults.

WHMIS

Workplace Hazardous Materials Information Systems (WHMIS) is a national communication system dealing with controlled products. The three main components of WHMIS are labels, material safety data sheets (MSDS), and worker education. We will customize our WHMIS course around your company and the controlled products your employees work with.

Safety Rep

Every employer on every jobsite must have a designated safety representative familiar with their legal duties and responsibilities. The safety rep will help with employee concerns and complaints, participate in the identification of risks to workers, inspections of the workplace, investigations, and the development and promotion of safety programs in the workplace.

Supervisor Skills (3 hours)

The supervisor skills course is excellent for supervisory positions, as it will help define their role. It explains the responsibilities for ensuring safety of the work site. As well as provide knowledge to satisfy the legal duties and responsibilities of a supervisor under the workplace safety and health act.

Fall Protection Basics (½ Day)

This program has been designed to ensure that all your employees are protected against falls and that you are in compliance with the latest workplace fall protection requirements. The course covers surface protection, fixed barriers, surface opening protection, travel restraint systems, fall arrest systems, fall containment systems, harness and usage and introduction to rescues.

Confined Space (8 hours)

The Confined Space course covers competencies within Workplace Safety and Health Regulations. It ensures participants have the skills they need to enter confined spaces as part of their work tasks. The course covers entry permits, ventilation, hardware, harnesses and equipment, tripods and hoists, atmospheric monitoring, and respiratory protection.

Qualitative Fit Testing

A respirator can only be effective if it properly fits the user. While conducting fit testing, we take our time with individual respirator users to review necessary user seal checks as applicable. We will review how to put on a respirator, how it should be positioned on the face, how to set strap tension and how to determine an acceptable fit

12 Panel Drug Testing

This test is a one step 12 panel drug test. The results of this test are instant. It is important to note that the results of an express test are qualitative, the results are either a pass or a fail and the level of the drug in the body is not determined. It tests for Amphetamines, Methamphetamines, Barbiturates, Benzodiazepines, Marijuana, Cocaine, Opiates, Phencyclidine, Methadone, Propoxyphene, MDMA (ecstasy), and Extended Opiates. There is a consent form that is to be read, understood and signed by each person participating in the test before they give their sample.
